

DevStudio
PowerPlotter Engine OKI Edition for
PLAVI

for LabelPrinter

The specific Rip solution for the printer PLAVI ES9542R

Main features of the solution:

Usability:

User friendly interface, simple & powerful

Better Quality:

Optimization of color quality on various media through specific profiles and specific screens optimized for images and flat colors.

More Productivity:

Work table to lay out labels and manage copies. Automatic and manual layout, visual report of jobs with automatic reprinting while maintaining all settings. Variable data management.

Cost Management:

Profiles optimized in the use of toner for lower consumption, calculation of file coverage and of the complete cost of printing and per label divided by toner and consumables.

Special Functions:

Patented technology* **BG.A.P.**[™], allows you to print on **colored labels**, using the background color as an additional color to reduce consumption, expand the gamut and obtain special effects e.g. on gold, black labels etc...

*patent no. 102018000011126 - Technology developed by DevStudio and Colorstream
